

# SMALL FLOCKS OF CHICKENS ...

## Do Not Need a Rooster

Well fed hens will lay tasty eggs without a rooster present.

## Are Not Loud

Only roosters crow. Hens only make noise briefly when laying, which never happens at night.

## Do Not Smell

Properly maintained chicken coops are healthy and not stinky. Chicken manure is highly compostable, unlike dog and cat waste.

## Take Little Space

A hen needs only 5 - 10 ft<sup>2</sup> of space.

## Do Not Attract Pests

Properly stored chicken food won't attract rodents anymore than dog or cat food. Chickens LOVE to eat pests like ticks, roaches, and slugs.

## Are healthy

Backyard hens are healthier than factory farmed birds.

# HENS FOR HOUSTON

A movement to lift Houston's restrictions on keeping chickens
